Pushing the Envelope for Excellence

You have one thing on your mind when it comes to choosing building products & solutions – they have to do more than perform today; they have to outperform for the long term. That’s why for over 50 years, Durabond has been the choice for those who expect more.

We are a leading manufacturer and developer of Exterior Insulated Cladding Systems, Specialized Architectural Coatings, Concrete Restoration Products, Protective Coatings, and a wide range of other related construction products. Whether a high-rise building or a single-family dwelling, a new construction or a restoration project, we understand the critical importance of getting it right the first time.

Our innovative, highly-engineered and tested systems are a creative solution for architects and designers. We are a tried, true and trusted choice for builders, engineers and homeowners who demand durability, superior flexibility, and aesthetic beauty.

Protective Coatings & Sealers

Durex® Protective Coatings and Sealers help protect and maintain most building surfaces and fascias. They are a cost effective and high-quality solution to protecting a variety of horizontal and vertical services.

- Building Façade Protective Coatings
- Protective Sealers – Walls
- Protective Sealers – Floors
- Concrete Surface Hardeners / Surface Consolidators

Roller Applied Protective Coatings

Designed to help preserve and protect the building envelope of concrete and masonry structures. Coatings are engineered to “breathe”, allowing trapped moisture to escape the envelope, while protecting the surface from moisture penetration.

Advantages

- Water repellent
- Colour-fast
- Protects moisture penetration
- Superior adhesion
- Extremely durable, abrasion resistant
- Heavy duty protective protective coatings

DUREX BRUSH COAT

09 94 00

Acrylic High Build Protective and Decorative Coating

DUREX BRUSH COAT is one of the many exterior textures offered by Durabond Products Ltd., under the trade name of Durex Architectural Coatings. DUREX BRUSH COAT is a high build protective coating 100% acrylic based. It is the most versatile of the Durex Architectural Coatings. It is primarily roller applied, resulting in a light, uniform, sand textured finish. It can also be applied by brush.

Possible Uses

DUREX BRUSH COAT, in a two coat application is an effective long wearing protective coating for concrete and masonry, for new as well as existing structures. DUREX BRUSH COAT provides a uniform appearance in both colour and texture.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010101G	DUREX Brush Coat (Gallon)	4 L/pail	N/A	90–120 ft ² /pail
010101	DUREX Brush Coat (Pail)	25 kg/pail	48 pails/pallet	350–400 ft ² /pail

Roller Applied Protective Coatings

ACROTEL EC-A

09 97 00

Elastomeric Anti-Carbonation Protective Coating

Durex® Acrotel EC-A Elastomeric Anti-Carbonation Protective Coating is a single component, liquid applied elastomeric, high build acrylic protective coating. It is designed to protect concrete structures against moisture intrusion and carbon dioxide diffusion, preventing the carbonation of concrete and risk of corrosion of the reinforcing steel.

Possible Uses

Durex® Acrotel EC-A Elastomeric Anti-Carbonation Protective Coating is used as a protective waterproof coating in vertical and horizontal applications over exterior above-grade walls, including concrete, brick, masonry, stucco, EIFS, stone, pre-cast, and exposed aggregate surfaces. Durex® Acrotel EC-A Elastomeric Anti-Carbonation Protective Coating will bridge hairline cracks throughout a wide range of temperatures.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
701020	DUREX Acrotel EC-A	25 kg/pail	48 pails/pallet	450–500 ft²/pail

ECTO-SIL 1000

09 24 00

Elastomeric High Build Decorative Silicone Coating

Durex® Ecto-Sil 1000 Elastomeric High Build Decorative Silicone Coating is a high solids, breathable silicone elastomeric coating for use in vertical above-grade waterproofing applications. It can be used to provide a durable, long-term, watertight, weatherproof barrier that resists colour fade, chalking and degradation from natural weathering.

Possible Uses

Durex® Ecto-Sil 1000 Elastomeric High Build Decorative Silicone Coating is used as an architectural decorative coating for above-grade wall surfaces such as concrete, stucco, masonry, urethane foam, wood, EIFS, and various painted surfaces. Durex® Ecto-Sil 1000 Elastomeric High Build Decorative Silicone Coating can be applied over a variety of substrates. Contact Durabond Technical Services for further information.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET
701101	Ecto-Sil 1000	18.9 L/pail	48 pails/pallet

Roller Applied Protective Coatings

DUREX EMC

09 96 00

Acrylic Elastomeric High Build Protective and Decorative Coating

DUREX EMC is a 100% acrylic based elastomeric high build protective wall coating. Its unique formulation permits bridging of minor cracks which can normally appear in walls. A breathable coating, the DUREX EMC provides an effective weather shield for wall surfaces.

Possible Uses

DUREX EMC can be applied over almost any solid substrate, but not limited to the following:

- Clean concrete and masonry and all other types of cementitious substrates
- Exterior and interior surfaces; stone, pre-cast, exposed aggregate surfaces
- Over solid clean substrates, including stucco with cracks not greater than 1.6 mm (1/16") wide

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010111	DUREX EMC	25 kg/pail	48 pails/pallet	450-500 ft ² /pail

DUREX EMC KNIFE GRADE

09 96 00

Acrylic Elastomeric Crack Filler

DUREX EMC-KNIFE GRADE is a single component water based, elastomeric, acrylic crack filler and repair product. It is used primarily to fill cracks, in concrete or other masonry type surfaces, prior to coating them with any one of our Durex Architectural Coatings. DUREX EMC-KNIFE GRADE can be used to fill cracks up to 6mm (1/4") width by 6mm (1/4") depth, in numerous substrates.

It is a highly filled paste that dries with minimal shrinkage. It is an internally plasticized, nonsag, thixotropic formulation which eliminates unsightly "telegraphing through" spots which commonly occur when externally plasticized crack fillers are used. Its unique formulation results in a weather-proof coating with excellent adhesion to numerous substrates, especially concrete and/or masonry, and it has minimal shrinkage which allow it to remain flexible through many thermal cycles.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET
010111K	EMC Knife Grade	18.9 L/pail	48 pails/pallet
010111KG	EMC Knife Grade (gal)	3.78 L/gal	48 pails/pallet

Roller Applied Protective Coatings

DUREX ROLTEX

09 96 00

Acrylic High Build Protective and Decorative Coating

DUREX ROLTEX is a 100% acrylic based high build textured protective coating. It is a component of Durex Architectural Wall Coatings.

Possible Uses

DUREX ROLTEX is an effective, long wearing protective coating for new and existing solid substrates when used in a two coat application. It provides a uniform appearance in both colour and texture.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010103	DUREX Roltex	25 kg/pail	48 pails/pallet	250–300 ft ² /pail/coat

DUREX DUR-X-CEL 100

09 90 00

Exterior Grade Acrylic Latex Paint

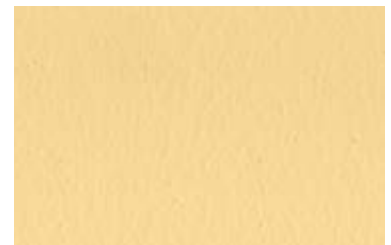

DUR-X-CEL 100 is a 100% flat acrylic based exterior grade paint.

Possible Uses

DUR-X-CEL 100 is used as a premium quality paint for exterior masonry and concrete surfaces. It can be pigmented to match almost any colour.

Ideal for recoating existing stucco and EIFS surfaces.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010510-500	Dur-X-Cel 100	18.9 L/pail	48 pails/pallet	1200–1500 ft ² /pail/coat

Roller Applied Protective Coatings

DUREX DUR-X-CEL PRIMER

09 90 00

Exterior Grade Acrylic Latex Primer

DUR-X-CEL PRIMER is a flat, 100% acrylic based primer. It is used as a premium quality primer for exterior masonry and concrete surfaces.

Advantages

- Exceptional exterior durability
- Excellent water repellency; protects walls from moisture penetration
- Breathable coating; allows water vapour within the wall system to evaporate
- Excellent adhesion to substrate
- Abrasion resistant
- Exceptional exterior durability
- Colour-fast (no colour change under ultraviolet rays)

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010501	Dur-X-Cel Primer (white)	18.9 L/pail	-	1200 ft ² /pail

DUREX ACROTEL SB NON-POROUS PRIMER

09 97 00

Non-Porous Surface Primer

Durex® Acrotel SB Non-Porous Primer is a high performance, solvent-based acrylic primer formulated to bond to high-gloss faced surfaces such as tile, glazed brick and metal.

Possible Uses

Durex® Acrotel SB Non-Porous Primer is used as a primer over impervious surfaces, plastic, ceramic tile, glazed tile, porcelain and exterior glazed brick. Durex® Acrotel SB Non-Porous Primer can be applied at sub-zero temperatures. It can be coated over with any of our Durex Architectural and Protective Coatings.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
701404	DUREX Acrotel SB Non-Porous Primer	18.9 L/pail	48 pails/pallet	1750 sf/pail

Epoxy & Urethane Metal Coatings

DUREX EPOTEL WB ANTI-CORROSION METAL PRIMER

09 97 00

Epoxy Water Based Coating

DUREX® EPOTEL ANTI-CORROSION METAL PRIMER is a two-component, high solid, modified epoxy water based coating. It is specially formulated to perform as a superior, durable, high-build protective coating to prevent corrosion with excellent adhesion to metal substrates.

Possible Uses

DUREX® EPOTEL ANTI-CORROSION METAL PRIMER is used as an anti-corrosion, adhesion promoting primer for a variety of metal substrates.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
703109	DUREX ANTI-CORROSION METAL PRIMER	5GAL-2K	1000 ft ² /pail
703109G	DUREX ANTI-CORROSION METAL PRIMER	1GAL-2K	200 ft ² /pail

DUREX EPOTEL WB DTM

09 97 00

Water-Based Epoxy Corrosion Resistant Metal Primer/Coating

DUREX EPOTEL DTM is a two component, high performance, versatile water-based aliphatic amine metal primer. It has good leveling, flow, microform-free and zero to very low VOC and odour free properties.

In exterior applications, DUREX EPOTEL DTM must be topcoated with Durex® AQUATHANE topcoat for UV stability.

Possible Uses

DUREX EPOTEL DTM is used as a direct to metal coatings, over a variety of metal surfaces to prevent the corrosion of steel and various metals.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
703402	DUREX EPOTEL DTM	5GAL-2K	1500 ft ² /pail
703402G	DUREX EPOTEL DTM	1GAL-2K	300 ft ² /pail

Epoxy & Urethane Metal Coatings

DUREX DURATHANE 90

07 15 00

Non-Yellowing UV Resistant Polyurethane Coating

Durex® Durathane 90, Non Yellowing UV Resistant Polyurethane Coating is a versatile, easy to use, thin build, abrasion resistant, durable, non-yellowing aliphatic urethane coating engineered specifically for coating and protecting a variety of surfaces.

Possible Uses

Durex® Durathane 90 is used as a UV Resistant topcoat for interior and exterior applications. It is used as a stand-alone floor coating or part of the Durex Floor Coating Systems to effectively protect surfaces and provide long lasting gloss and colour retention. Durex® Durathane 90 is also an effective coating for metal, a highly protective and durable wall coating and a topcoat for wood.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
702806	DUREX DURATHANE 90	5 gal kit	N/A	-
702806G	DUREX DURATHANE 90 (GAL)	1 gal kit	N/A	400 ft ² /gallon

Acrylic Based Metal Coatings

DUREX TBC

09 97 00

Skid Resistant Maintenance Floor Coating

DUREX TBC is a high quality di-vinyl ester-based, heavy duty maintenance coating which provides excellent durability and safety protection to all types of surfaces in any type of environment, with particularly exceptional protection for steel and concrete surfaces.

Possible Uses

Some of the areas where DUREX TBC can be used are parking garage floors, for protection against chloride penetration; industrial floors for a safe, non-slip finish and protection against acid, oil, gas, etc; structural steel (bridges, storage tanks, etc); all areas around dock yards.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010503	DUREX TBC	18.9 L/pail	48 pails/pallet	425 ft ² /pail

DUREX ACROTEL SUPERBOND METAL PRIMER

09 97 00

Acrylic Based Metal Primer

DUREX ACROTEL SUPERBOND METAL PRIMER is a single component, water-based, high performance fast drying acrylic concrete and metal sealer/primer with low odour and VOC.

Possible Uses

DUREX ACROTEL SUPERBOND METAL PRIMER is specially formulated to be used as a primer for metal surfaces. It has excellent adhesion to a variety of masonry metal and glass substrates, it is also fast dry and has early resistance to water.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
704401	DUREX ACROTEL SUPERBOND METAL PRIMER	5GAL-2K	800 ft ² /pail
704401	DUREX ACROTEL SUPERBOND METAL PRIMER	1GAL-2K	160 ft ² /pail

Acrylic Based Metal Coatings

DUREX ACROTEL DTM

09 97 00

Acrylic Based Direct to Metal Coating

DUREX ACROTEL DTM is a Direct to Metal, versatile, waterborne all acrylic enamel paint. It is specially formulated for exterior/interior applications. DTM is a high performance extra low VOC coating and has excellent adhesion to metal as well as a variety of substrates. ACROTEL DTM is the best alternative to solvent-based alkyd enamel coatings. It holds UV resistance and features non-yellowing chemistry.

Possible Uses

DUREX ACROTEL DTM is used as a direct to metal coating. It is an ideal coating for metal railings, window frames, metal panels, hospitals, food processing plants and other institutional, commercial, residential and restoration applications.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
703102	DUREX Acrotel DTM	18.9 L/pail	48 pails/pallet	1500 ft ² /pail
703102G	DUREX Acrotel DTM (Gallon)	3.78 L/pail	4L/pail	300 ft ² /gal

DUREX ACROTEL SB METAL

09 97 00

Acrylic / Solvent Metal Coating

Durex® Acrotel SB Metal Acrylic/Solvent Metal Coating is a unique single component, solvent-borne acrylic polymer based coating for metal applications.

Possible Uses

Durex® Acrotel SB Metal Acrylic/Solvent Metal Coating is used for both exterior and interior applications. It is an easy to use one-coat system for steel, galvanized steel and aluminum.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
703101	DUREX ACROTEL SB METAL	5GAL-2K	1500 ft ² /pail
703101G	DUREX ACROTEL SB METAL	1GAL-2K	300 ft ² /pail

Protective Sealers - Wall

DUREX WALL SEAL

09 97 00

Clear Acrylic Concrete & Masonry Sealer

DUREX WALL SEAL is a 100% acrylic based clear sealer for use as a protective coating on walls and ceilings. The application of DUREX WALL SEAL greatly reduces dirt pick-up from pollution laden air. It does not alter the colour of the surface to which it is applied.

Possible Uses

DUREX WALL SEAL can be used for the following applications:

- Topcoat for all Durex Architectural Coatings
- Interior and exterior application
- All locations where a clear weather shield is desired
- Sealer for masonry and concrete substrates, including ceilings and soffits

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010556	DUREX Wall Sealer 15	18.9 L/pail	48 pails/pallet	6 m2/L (255 ft²/gal)
010557	DUREX Wall Sealer 25	18.9 L/pail	48 pails/pallet	6 m2/L (255 ft²/gal)

DUREX DUR-A-SEAL A28

09 97 00

Clear Acrylic Concrete & Masonry Sealer

DUREX DUR-A-SEAL A28 is a single component clear acrylic copolymer based on methacrylate resins.

Possible Uses

DUREX DUR-A-SEAL A28 effectively seals brick, block and concrete against the ingress of water. It also has superior chloride screening capabilities which make it ideally suited to protect all but the high traffic areas of concrete structures such as parking garages and bridges. The DUREX DUR-A-SEAL A28 clear coating is extremely resistant to weathering effects. It also provides a uniform and easy-to-clean surface for walls and floors.

DUREX DUR-A-SEAL A28 will ‘breathe’, that is, liquid water will not pass through the coating but water vapour can vent to the atmosphere from within the coated surface. This feature is essential on heated buildings and on structures in contact with earth or water. It is resistant to a wide range of weak acidic and alkaline solutions. Good inter-coat adhesion allows for repair and re-coating after cleaning. This product also has proved to be a long term sealer for stone / concrete driveways and other low traffic areas.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
010713	DUREX Dur-A-Seal A28	18.9 L/pail	48 pails/pallet	2.4–3.3 m2/L
010713G	DUREX Dur-A-Seal A28 (Gallon)		4 L/jug	4 jugs/box (98 - 135 ft²/gal)

Protective Sealers - Walls

DUREX DUR-A-SEAL A.G.

09 96 23

Aliphatic Polyurethane Anti-Graffiti Sealer

DUREX DUR-A-SEAL AG is a two component, versatile water-based, self crosslinking Urethane. It is a high performance topcoat, specially formulated to meet the conditions and properties required for anti-graffiti coatings.

Possible Uses

DUREX DUR-A-SEAL AG can be applied to existing masonry surfaces to provide a durable, weatherproof sealer. The cured sealer has excellent resistance to chemical based graffiti and this allows removal of graffiti without removal of the sealer. Because it is water-based, it can be applied over many existing coatings to upgrade the anti-graffiti performance of such coatings.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
010715	DUREX Dur-A-Seal AG	5 gal kit	300 ft ² /gal
010715G	DUREX Dur-A-Seal AG	1 gal kit	-

Protective Sealers - Floors

DUREX DUR-A-SEAL XL 250 (EXTERIOR ONLY)

033500

Clear Acrylic Concrete & Masonry Sealer

DUREX DUR-A-SEAL XL 250 is a single component clear xylene based, acrylic copolymer sealer.

Possible Uses

DUREX DUR-A-SEAL XL 250 is used primarily to seal DUREX ART-I-STONE when the application is carried out on exterior surfaces, both vertical and horizontal. It effectively seals against the ingress of water and it protects the colour and texture of the DUREX ART-I-STONE. Its superior wear resistance and its ability to withstand chlorides make it ideally suited for protection of exterior pedestrian traffic areas such as walkways, concrete decks, verandas, stairs, pool decks, etc. DUREX DUR-A-SEAL XL-250 is extremely resistant to weathering effects and it also provides a uniform and easy to clean surface for walls and floors. It is a breathable coating, that is, liquid water will not pass through the coating but water vapour can vent to the atmosphere from within the coated surface. It is also resistant to a wide range of weak acidic and alkaline solutions. Good inter-coat adhesion allows for repair and re-coating after cleaning.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE

DUREX ACROTEL SB FLOOR GRADE

033500

Pigmented Acrylic Concrete & Masonry Coating

Durex Acrotel SB Floor Grade is a pigmented single component acrylic copolymer based on methacrylate resins.

Possible Uses

Durex Acrotel SB Floor Grade effectively seals brick, block and concrete against the ingress of water. It also has superior chloride screening capabilities which make it ideally suited to protect all but the high traffic areas of concrete structures such as parking garages and bridges. The pigmented coatings are extremely resistant to weathering effects.

Advantages

This product provides durable protection of concrete balconies, exterior walls, exterior of water towers and any concrete or masonry structure where uniform colour and easy clean surfaces are required.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
702101	Durex Acrotel SB Floor Grade	18.9 L/pail	48 pails/pallet	3.7-4.5 m ² /L (151-183 ft ² /gal)

Protective Sealers - Floors

DUREX CONCRETE SEALER WB 18/25

03 35 00

Water Based Concrete Sealer and Densifier

Durex® Concrete Sealer WB 18/25 Acrylic Concrete & Masonry Sealer is a single component, waterbased high-quality acrylic latex sealer. It is a versatile sealer, used for both exterior and interior applications. This product replaces solvent borne acrylic sealers.

Possible Uses

Durex® Concrete Sealer WB 18/25 Acrylic Concrete & Masonry Sealer is used as an economical dust proofing concrete sealer, interlock bricks, plasters, masonry and Venetian plasters.

Available in 18% and 25% solids concentration. Refer to data sheets for more information.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET
705151	DUREX Concrete Sealer WB 18	18.9 L/pail	48 pails/pallet
705152	DUREX Concrete Sealer WB 25	18.9 L/pail	48 pails/pallet

DUREX EPOTEL 80

03 35 00

Epoxy Penetrating Concrete Sealer

Durex® Epotel 80 High Solids Epoxy Floor Primer & Sealer is a two component, 80% solids, liquid applied epoxy floor primer and sealer. It is formulated to penetrate and bond into the substrate, acting as an aggressive primer for a variety of surfaces. Durex® Epotel 80 is also used as a high quality stand-alone sealer.

Possible Uses

Durex® Epotel 80 High Solids Epoxy Floor Primer & Sealer is a roller or squeegee applied high penetrating flooring primer and sealer. Used as an aggressive primer for Durex® Epotel and Uraflex floor coatings. It is also used as a stand-alone high-quality clear sealer for interior concrete floors.

ITEM #	ITEM NAME	PACKAGING	COVERAGE
702420	DUREX Epotel 80	5 gal/kit	3.7 m ² /L (150 ft ² /gal)

Concrete Surface Hardeners / Surface Consolidators

DUREX DIAMOND LOK

03 35 00

Water Based Concrete Sealer and Densifier

DIAMOND LOK is a ready to use, clear, water based penetrating sealer designed for application to the surface of concrete, above or below grade, interior or exterior.

Possible Uses

DIAMOND LOK can be brush rolled or sprayed on concrete for sealing, hardening, dust proofing, waterproofing and weatherproofing. Protects concrete surfaces from abrasion and freeze-thaw damage and stops water seepage where it is not caused by cracking or other structural failure.

Advantages

- Increases concrete density and hardness
- Prevents chemical corrosion and physical abrasion of the treated surface
- Effective in reducing freeze thaw spalling
- Treatment is permanent and does not require subsequent reapplication every few years
- Effective as a negative side waterproofing against a hydrostatic head over 115 ft
- Reduces or eliminates efflorescence and leaching in concrete

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET
010720	DUREX Diamond Lok	18.9 L/pail	48 pails/pallet

DUREX SILANE WRS 40/100

03 35 00

Clear Silane Breathable Water Repellent Sealer

Durex® Silane WRS Clear Silane Breathable Water Repellent Sealer is a single component silane based water repellent sealer which is formulated to be used as a high performance waterproofing and water-repellent alkoxy silane sealer ideal for protecting concrete and masonry surfaces.

Possible Uses

Durex® Silane WRS Clear Silane Breathable Water Repellent Sealer is a single component silane based water repellent sealer which is formulated to be used as a high performance waterproofing and water-repellent alkoxy silane sealer ideal for protecting concrete and masonry surfaces.

Available in 40% and 100% solids concentration. Refer to data sheets for more information.

ITEM #	ITEM NAME	PACKAGING	UNITS/PALLET	COVERAGE
705200	DUREX Silane WRS 40	18.9 L/pail	48 pails/pallet	4.3 m2/L (175 ft²/gal)
